SUMMARY

A third-year computer science student seeking to shift my career path from IT specialist to web developer. My experience in the IT field has well-prepared me to face programming challenges, where I wish to apply my knowledge and skills.

I am interested in modern technologies such as the MERN stack and Nuxt framework, and I am committed to improving my skills in these areas.

Currently, I am looking for internship opportunities that would allow me to contribute to software development projects, applying my analytical skills and creativity.

My goal is not only to make meaningful contributions to team efforts but also to continue developing as a software developer, working in an environment full of challenges and innovations.

EXPERIENCE

Wordpress Website   Present
https://www.Autokorega.lt ↗

- Client Communication and Front-End Development: Actively contributed to a three-person team, creating a custom WordPress website for Autokorega, where I played a key role in front-end development and served as the primary contact with the client. Ensured a smooth experience and efficient collaboration between the client and our team.
- Iterative Design and Development: Utilized Figma for design mockups and adapted to changing client requirements.
- Skill Enhancement: First-time use of WordPress with the SeedProd builder plugin. Due to limitations of the plugin's free version, had to think of ways to implement unique client-requested functionality using additional HTML, CSS, and JavaScript without any frameworks.

480 hours Full-stack JavaScript internship   08/2022 - 11/2022
UAB Iverta ↗

- MoGo project(HTML, CSS(SASS))
- Burger project(React and TypeScript)

Servers / Network Technician   04/2020 - 04/2022
Restore Technology

- IT Equipment Processing: Servers (HP, Dell, Cisco), BladeSystems, NAS, and network devices such as switches, access points, routers, etc. (Cisco, Juniper Networks, HP, Infoblox, Riverbed, Creston, Fortinet, Cyclades)
- Equipment Verification: Assessing whether the equipment could be reused and sold. Testing by connecting via CLI (PuTTy) or other methods, erasing all information potentially related to clients, and resetting all settings to factory defaults
- Workstation Setup: Installing and managing Ethernet cables, connecting monitors to computers, installing operating systems
- Processed tens of thousands of different devices during my tenure
- Served as the go-to person for problem-solving when the responsible team leader was not available
- Appointed as temporary production team leader for 3 months, a role that involved guiding and directing other employees, overseeing activities to promote productivity and efficiency
- Each day presented a challenge, requiring me to learn how to process equipment I had never encountered before, all within set deadlines.

IT Service Desk/Imaging Technician
Restore Technology

01/2020 - 04/2022

- Responsible for managing imaging/deployment projects for two major clients
- Daily customer service and technical support, serving as the primary point of contact
- Installation of new devices using tools such as SCCM, Microsoft Intune, Windows Autopilot, Microsoft Deployment Toolkit
- Collaboration with Microsoft engineers to identify and rectify issues in devices that stopped working or were not functioning as intended
- Daily assistance to the company's system administrator, helping with tasks such as installing and preparing necessary equipment for executive director meetings, and troubleshooting their personal work devices

IT Technician
Restore Technology

11/2019 - 04/2022

- Equipment processing and testing: computers, laptops, monitors, televisions, telecommunication devices, printers, and various other devices such as surveillance cameras, projectors, etc.
- Device repair, removal of client-related data, and preparation of equipment for sale
- One of only three people in the company with special permissions to edit product templates in the internal management system, alongside the team leader and system administrator
- Use of Blancco data erasure system to remove client data
- Utilisation of scripts to restore BIOS information

Fulfilment Associate
Amazon

09/2016 - 07/2019

- Worked in a very high value items department, access granted only to the best few associates of the company
- Daily use of Linux based internal systems created by Amazon

EDUCATION

Computer Science
Klaipedos Valstybine Kolegija / Higher Education Institution - Professional Bachelor's Degree

09/2022 - 2025

- Erasmus+ Blended Intensive Program - Creative Coding in the Context of Concrete Art and AI - Hochschule Fulda University of Applied Science, Germany(18/09/2023 - 04/12/2023)
- Erasmus+ Blended Intensive Program AI & You(won 1st place) - Turiba University, Riga, Latvia (23/06/2023 - 07/07/2023)
- Klaipėdos Valstybinė Kolegija / Higher Education Insitution: National Scientific-Practical Student Conference „Business, Technology, Biomedicine: Innovation Insights 2023 - "Presentation about "Figma"(17/05/2023)

SKILLS

Agile, Scrum, Kanban, Trello

Python basics

MERN(MongoDB, Expres, React, Node)

Android Studio(Kotlin)

HTML, CSS(Tailwind, Sass, Bootstrap), JavaScript

Wordpress(SeedProd, WooCommerce)

Vue.js(Nuxt)

LANGUAGES

English

Fluent

Lithuanian
